PERMASTOP ACCELERATOR

Surface treatment for porous concrete

A clear ready-to-use chemical compound which, on being applied to the floor, is absorbed into the concrete pores and reacts with the calcium salts effectively making the concrete surface denser and considerably less porous. For improving the hardness and denseness of concrete and reducing its permeability. This cuts down dusting, improves resistance to staining from oils and other spillage's and provides a harder wearing surface.

BENEFITS

- Ready for use
- Easy to use
- UV stable
- For interior and exterior use
- Cost effective solution for permeability and 'dusting' cement based surface
- Improves surface abrasion

SPECIFICATIONS

Storage & shelf life	In unopened drums shelf life is at least 12 months after date of invoice. Protect from freezing
Type	Concrete surface hardener and anti-dusting agent
Coverage	Depends upon the suction and texture of the surface. Approximately 6m ² / litre/ coat
Substrate suitability	Minimum 7 day old concrete
Packaging	5 & 25 litre containers
Protection during application	Use sun and wind barriers as required
Colour/s	Transparent
